keeping our region connected  
with news and information

## 2010 Census Counts are here!

By: Allen Burns, Executive Director

According to the 2010 Census Count, our Coastal Region experienced a 17.3% increase in population. National experienced a 9.7% increase and Georgia experienced an 18.3% increase in growth from 2000-2010.

The table below highlights the U.S. Census change in population from 2000 to 2010. **Numbers in green indicate that the area exceeded the regional growth rate. Numbers in red indicate that the area lost population.** The third column shows the 2005 population estimate from the Georgia Tech population study completed in 2006.

	2010 Census	2005 GA Tech Population	2000 Census		2010 Census	2005 GA Tech Population	2000 Census
<b>Bryan County</b>	30,233	30,520	23,417	<b>Glynn County</b>	79,626	75,084	67,568

Serving the Cities and Counties of Coastal Georgia

Bryan, Bulloch, Camden, Chatham, Effingham, Glynn, Liberty, Long, McIntosh and Screven

# 2010-2011 CRC Council

## EXECUTIVE OFFICERS

**Dan Coty, Chairman**  
Private Sector  
Representative,  
Glynn County

**Walter Gibson,**  
**Vice-Chair**  
Bulloch County  
Commissioner

**Jim Thomas,**  
**Secretary**  
Mayor, City of  
Hinesville

**Allen Burns,**  
CRC Executive Director

**BRYAN COUNTY**  
Chairman Jimmy Burnsed  
Bryan Co. Commission

Mayor Harold Fowler  
City of Richmond Hill

Sean Register  
Non-Public

**BULLOCH COUNTY**  
Walter Gibson  
Bulloch Co. Commission

Mayor Joe Brannen  
City of Statesboro

Dr. Ronald Shiffler  
Non-Public

**CAMDEN COUNTY**  
Chairman David Rainer  
Camden Co. Commission

Mayor Bill Deloughy  
City of St. Marys

Craig Root  
Non-Public

**CHATHAM COUNTY**  
Chairman Pete Liakakis  
Chatham Co. Commission

Mayor Otis Johnson  
City of Savannah

Chris Blaine  
Non-Public

*Two Vacancies*

**EFFINGHAM COUNTY**  
Reggie Loper  
Effingham Co. Commission

Mayor Ken Lee  
City of Rincon

Herb Jones  
Non-Public

**GLYNN COUNTY**  
Jonathan Williams  
City of Brunswick

Chairman Tom Sublett  
Glynn Co. Commission

Dan Coty  
Non-Public

Shaw McVeigh  
Non-Public

**LIBERTY COUNTY**  
Chairman John McIver  
Liberty Co. Commission

Mayor Jim Thomas  
City of Hinesville

Robert Stokes  
Non-Public

Allen Brown  
Non-Public

**LONG COUNTY**  
Chairman Robert Walker  
Long Co. Commission

Mayor Myrtice Warren  
Ludowici City Council

William Miller  
Non-Public

**MCINTOSH COUNTY**  
Chairman Kelly Spratt  
McIntosh Co. Commission

Joe Malbasa  
City of Darien

Jason Coley  
Non-Public

**SCREVEN COUNTY**  
Chairman Will Boyd  
Screven Co. Commission

Mayor Margaret D. Evans  
City of Sylvania

Herb Hill  
Non-Public

## **STATE OF GEORGIA APPOINTMENTS**

Tom Ratcliffe

Randal Morris

Chap Bennett

Linda Barker

*One Vacancy*

## **EX-OFFICIO MEMBERS**

Clarence Knight  
City of Kingsland

Dr. Priscilla Thomas  
Chatham County Commission

Dina McKain  
Fort Stewart

Dr. Ben Thompson  
Chair, Coastal Regional  
Water Planning Council

Dorothy Glisson  
Screven County

## Highlights from the Coastal Regional Commission Council Meeting

By: Colletta S. Harper, Administrative Services Director

The Coastal Regional Commission (CRC) Council met on Wednesday, March 9th at the Richmond Hill Quality Inn with 20 members in attendance, representing ten counties.

### Action taken by the Council included:

- Approval of Minutes from February 9, 2011 meeting;
- Appointment of Robert Stokes to the Coastal Georgia EB-5 Regional Center Board;
- Approval of Executive Director's Evaluation;
- Approval of Resolution to Transmit Regionally Important Resources (RIR) Plan to DCA;
- Accepted Master Plan as full performance and approve work under contract with CHA; and
- Accepted Recommendations of CRC Staff that DRI 2186 is in the best interest of the state

### Other Items to note:

- The CRC will host a HB277 Workshop on March 15th from 9:00-noon at the Coastal EMC in Midway. The workshop is intended for the cities and counties that are not on the Council or Roundtable and are not directly involved in the process.
- Fort Stewart has requested that we hold our CRC Council meeting at their location in May instead of April.
- LiDAR data has been received for Camden, McIntosh and Bryan Counties; the remaining data should be received within a couple of weeks and then it will be distributed to our member counties at the same time. It will be each county's responsibility to manage their own data as they see fit.
- The Tybee Island Shuttle, which is a fixed-route from downtown Savannah to Tybee Island, kicked off Monday. GDOT is giving us flexibility, so we are looking for similar projects throughout our region.
- SB86, which is a mandatory planning bill, has passed the Senate and has moved to the House. The Bill does away with mandatory comprehensive plans, DRIS, and Quality Local Government (QLG) status. ACCG and GMA are promoting this Bill.
- The Department of Audits accepted our FY10 Audit with no corrections
- It is time for the Comprehensive Economic Development Strategy (CEDS) Plan to be updated. Input is encouraged as this document is used to garner funding from EDA.

The next meeting of the Coastal Regional Commission Council will be held on Wednesday, April 13, 2011 beginning at 10:00 a.m. at the Richmond Hill Quality Inn.

## Historic Effingham-Ebenezer Route a Legacy of Our State's Treasured Places

By Ron Sadowski, Transportation Planner

A new scenic drive, the Historic Effingham-Ebenezer route in Effingham County has been added by the State Transportation Board to the roster of Georgia Scenic Byways.

On March 17th, a delegation from Effingham County attended the State Transportation Board meeting. The route was officially adopted and representatives from Effingham were presented with framed copies of the resolution.

Byways spread across Georgia – each a special drive and destination unto itself; each commemorating an important time or place; honoring our remembered or forgotten history; or simply reminding us of the beauty and bounty of our state.

The Historic Effingham-Ebenezer route, a 60-mile trip through the towns of Ebenezer, Guyton, Springfield and Rincon, was sponsored by the Effingham Chamber of Commerce, Georgia Salzburger Society and Historic Effingham Society. The route celebrates the beauty of one of Georgia's original eight counties and the history of Ebenezer – founded by German Lutherans seeking religious freedom. "It's a beautiful drive and an area of fascinating history," State Transportation Board Member Bobby Parham of the 12th Congressional District noted.

The Georgia DOT's Scenic Byways Program is a community driven effort which seeks to preserve the legacy of our state's treasured places in ways that enhance both their protection and their economic development. The Coastal Regional Commission assists local governments to utilize state and federal programs to improve communities by providing planning and grant services. For more information on the Scenic Byway program contact Ron Sadowski, Transportation Planner at [rsadowski@crc.ga.gov](mailto:rsadowski@crc.ga.gov) or (912)-262-2883.

## CEDS Update

By: Don Masisak, Economic Development Director

Each year the U.S Economic Development Administration provides funds to the Coastal Regional Commission for the operation and management of an Economic Development Program which provides technical assistance to the Council member counties and cities. A requirement of the contract is to develop and implement a Comprehensive Economic Development Strategy (CEDS) document which identifies and describes key economic development projects in each county. These projects are presented by members of a CEDS Advisory Committee comprised of public and private representatives from throughout the 10 county region.

The CEDS document serves as a regional action plan that identifies projects at the local level that can provide the impetus for economic growth and the creation of new jobs. Also with the inclusion of the project within the CEDS document, it can then serve as a validation of need when the applications are submitted to EDA requesting grant assistance for infrastructure projects. The CRC submitted a CEDS document to EDA in 2007 which identified goals and objectives; issues and opportunities; strategic projects and associated performance measurements. Each county identified critical projects with the greatest need which, in many cases, have been funded.

The CRC has initiated a process to begin updating the CEDS document which will incorporate a new project identification list that better reflects the needs, issues and opportunities of today's economic conditions. The first meeting is scheduled with the county economic development authority directors which will begin the identification process for new projects and also begin discussions on the suggestion and need of projects of regional significance to also be a part of the CEDS update.

The 2007 CEDS document can be reviewed on line at the Commission's home page, [www.crc.ga.gov](http://www.crc.ga.gov) and then click on Economic Development and then click on EDA for CEDS Document 2007.

## New Addition to Planning & Government Services

By Lupita McClenning, Director of Planning

Kevin Sullivan is the newest addition to the Planning & Governments Services Department. Kevin brings his experience in Planning and GIS having served both in the public and private sector. In his most recent planning position, Kevin served as Planner and City Arborist for the City of Fernandina Beach, Florida. His experience is enhanced by his Bachelor of Science degree from Stetson University. An avid fisherman, he is also a kayak guide for Kayak Amelia providing guided kayak and eco-tourism tours.

*Kevin Sullivan  
Land Use Planner*

As Land Use Planner, Kevin is responsible for planning studies and reports. Specifically, Kevin will lead our efforts in these areas:

- Implementation of the Regional Plan
- Joint Land Use Study – Ft. Stewart
- Sylvania Housing Infill Plan
- Sylvania Pedestrian Plan
- Comprehensive Plan Updates

Kevin will assist with Developments of Regional Impacts (DRI); collaborate with David Dantzler in GIS, with Chris Emmer in environmental planning, and Ron Sadowski with transportation planning. Kevin can be reached at [ksullivan@crc.ga.gov](mailto:ksullivan@crc.ga.gov) or by calling 912.262.2871.

## Spotlight on Spring Grant Opportunities

By: Sarah Yednock, Grants Specialist

The Georgia Forestry Commission administers two grant programs funded by the U.S. Forest Service: Making the Shade and the Urban and Community Forestry Grant.

**Making the Shade** is designed to provide up to \$5,000 for planting shade trees at elementary schools. The program objectives include achieving reductions in surface temperature, ground level ozone, skin damage and respiratory problems, as well as increasing green learning environments and energy conservation.

The **Urban and Community Forestry Grant** provides up to \$20,000 to accomplish objectives within the following categories:

1. Management plans
2. Arborist staffing
3. Tree ordinances
4. Organizational Development
5. Information and Education

Both grant programs require applications to be submitted by May 6, 2011. Grant workshops will be held at different locations throughout Georgia in April. Details are available online at: <http://www.gfc.state.ga.us/>

The National Endowment for the Humanities offers a **Preservation Assistance Grant** to small and mid-size institutions such as museums, libraries, universities, and local government records offices to improve their capacity to preserve significant humanities collections, including books, archives, textiles, artifacts, photographs, and historical objects. Up to \$6,000 may be requested for staff training, preservation supplies, equipment for environmental monitoring, or to hire a consultant to assist with preservation.

Applications for the Preservation Assistance Grant are due May 1. Information about the many other grants administered by the National Endowment for the Humanities throughout the year can be found at: <http://www.neh.gov/grants/grants.html>

Georgia's Department of Transportation will make \$250,000 available **Innovative Highway Safety Grants** awarded to programs which address one of the following:

- Underage Drinking Prevention
- Administrative Judges Program
- Traffic Records
- Minority Highway Safety
- Law Enforcement Strategies for Highway Safety

Eligible applicants include city and county governments, non-profits, county health departments and local law enforcement agencies. Applications are due in June and can be found at: <http://www.gahighwaysafety.org>. A mandatory grant application training workshop will be held in May at the GA Public Safety Training Center in Forsyth, GA.

## Marvara Green Elected President of GAIRS

By: Pamela Rogers, Aging QA Specialist

At the February 17, 2011 meeting of the Georgia Alliance for Information & Referrals Systems, Gateway Program Manager, Marvara Green, accepted the elected position of President after serving as the organization's Vice President for two years. GAIRS

is an affiliate of the Alliance of Information and Referral Systems (AIRS) dedicated to improving access to services for all people through quality information and referral. AIRS provides a professional umbrella for all I&R providers in both public and private organizations. Comprehensive and specialized I&R programs are found in nearly every community and operate as a critical component of the health and human service delivery system.

The Coastal AAA provides information and referral services through our Gateway Department and employs eight staff with AIRS certification. The agency believes in the standards-driven approach of the national alliance and is pleased to have one of its own serving on the GAIRS board.

The Mission of AIRS is: "To provide leadership and support to its members and Affiliates to advance the capacity of a Standards-driven Information and Referral industry that brings people and services together."

Marvara Green  
Gateway Program Manager  
Current GAIRS President

## Coastal Georgia AAA Offers Tailored Care Training

by: Pamela Rogers, Aging Quality Assurance Specialist

The Coastal Regional Commission Area Agency on Aging (AAA) continues to support the Division of Aging Services (DAS) in their statewide initiative to implement TCARE (Tailored Care Assessment and Referral) through Georgia AAA's as the service delivery model for serving family caregivers. TCARE Master Trainers, LaQuana Edwards, Marvara Green and Pamela Rogers, provided TCARE training on March 22-24, to seventeen trainees from Heart of Georgia, River Valley, Southern Georgia, Southwest Georgia, Central Savannah River Area, and Coastal Georgia AAA's and staff from the Alzheimer's Association, Savannah chapter.

The coastal TCARE training team is among the seven qualified master trainers in the state introducing case managers to an evidence-based protocol for effectively serving caregivers.

TCARE is a care management process designed to assist care managers who work with older adults and their family caregivers. Grounded in the Caregiver Identity Theory, the TCARE process is a guided protocol that reflects current knowledge of research about caregiver intervention. The protocol was developed by Dr. Rhonda Montgomery with colleagues from the University of Wisconsin-Milwaukee; UW-Extension, Cooperative Extension Service; and the University of Nebraska-Omaha. To learn more about the TCARE protocol, visit [www.tcure.uwm.edu](http://www.tcure.uwm.edu).

## Coastal AAA Offers Hope to Families Dealing with Alzheimer's Disease: Georgia REACH

By: Pamela Rogers, Aging Quality Assurance Specialist

The Coastal Area Agency on Aging is excited to offer a great new program designed specifically for caregivers of individuals with Alzheimer's disease or other types of dementia. Caring for someone with memory loss can often times be overwhelming and stressful. Loved ones don't always know how to handle the many unique behaviors associated with the disease, and depression and burnout are oftentimes the result. We're happy to announce the Georgia REACH program is here to help!

Peggy Luukkonen, case manager for Georgia REACH explains that every part of the program is built around the specific needs of each caregiver. She currently has 6 caregivers enrolled in the program and feedback has been very positive. "Over a six month period of time, we work one-on-one with caregivers in their own homes, giving them tools designed to make their caregiving role more manageable", says Luukkonen. Families are provided with information on Alzheimer's and dementia and are trained on skills to manage changes in behaviors as well as techniques to managing their own stress.

GA REACH is based on several years of research with hundreds of caregivers. These caregivers tried a number of different approaches for caring for loved ones and the most helpful approaches were put together into a single package to form Georgia REACH. No one person with Alzheimer's or dementia is the same, therefore the combination of approaches can be tailored specifically to each caregiver. Families get tips on dealing with problem behaviors like; wandering, repetitive questioning, agitation, incontinence, and sundowning.

One Savannah resident is caring for her husband, reports that she likes the program because she gets to meet routinely with someone to talk about her and her husband's specific situation. She says she is more apt to try the strategies that have been discussed when she knows her case manager will be following up with her. This caregiver has already started using some of the stress management techniques and is pleased because the program "doesn't put everyone in the same category". Another caregiver in Liberty County says that she signed up because she wanted to learn how to take better care of herself. She realizes that she needs to care for herself in order to care for her mother effectively.

There is no fee for participation in the GA REACH program and there are no income or age limits. The program is offered in cooperation with the Rosalyn Carter Institute and is available in all of the communities served by the Coastal Area Agency on Aging. For more information on the GA REACH program or to enroll, call 1-800-580-6860.

## Coastal GeoTools 2011

*By Kevin Sullivan, Land Use Planner*

Members from the Planning & Government Services Department attended the Coastal GeoTools Conference March 2011. The conference is hosted by the National Oceanic and Atmospheric Service's Coastal Services Center (NOAA CSC) a world leader in coastal science and management. It focuses on geospatial data, tools, technology and information for coastal resource management professionals. Coastal resource managers around the country use geospatial technology to address shoreline erosion, prepare land use plans, undertake port and waterfront planning, and protect people and property from natural hazards. The conference featured presentations by a wide variety of government, academic, and industry organizations.

This year's conference, held in Myrtle Beach, South Carolina, focused heavily on building the Digital Coast (<http://csc.noaa.gov/digitalcoast/>), a web platform that provides access to geospatial data, tools and technical training. Other session topics covered shoreline change, climate change and sea-level rise, natural hazards, land use and community development, marine spatial planning, data access and management, ever-changing political and financial paradigms and industry trends and contracting. Many of the conference's sessions dealt with topics directly applicable to the management of Georgia's regionally significant resources along the coast. Special interest meetings discussing comprehensive and interactive approaches to mapping sea level rise and inundation are especially important in the context of climate change. Building coastal web atlases to support web-based learning and the sharing of geospatial information were also of great interest, as were the various discussions on coastal hazards and habitat impacts. In addition, the latest technological advancements in the field were on showcase, giving a glimpse of the future direction of the geospatial industry.

Georgia's Coastal Regional Commission (CRC) was well represented at the conference through the attendance of three geospatial professionals. The CRC attendance allowed for networking and sharing of ideas, best practices and partnership building opportunities. Topics covered in the GeoTools conference and the knowledge and experience gained aid the CRC staff in efforts related to the Coastal Georgia Elevation Project (CGEP), the Regional Plan and Watershed Inventory Plans to name a few. Additionally, this knowledge and experience is available to the local governments we aim to serve.

For more information contact the CRC by emailing [ddantzler@crc.ga.gov](mailto:ddantzler@crc.ga.gov) or [ksullivan@crc.ga.gov](mailto:ksullivan@crc.ga.gov) or visit <http://csc.noaa.gov/>.

## Coastal Georgia Elevation Project Wrapping Up

*By David Dantzler, Geographic Information Officer*

After three years of intense planning and hard work by a multi-member consortium of federal, state, and local government agencies and private-sector organizations, the first phase of the Coastal Georgia Elevation Project (CGEP) is coming to an end. The CGEP is an effort to collect highly accurate elevation data for the Georgia Coast through the use of Light Detection and Ranging (LiDAR). The CGEP is funded by local governments, the United States Geological Survey (USGS), the Georgia Department of Natural Resources (GADNR), the National Oceanic and Atmospheric Administration (NOAA), and the Federal Emergency Management Agency (FEMA).

LiDAR is a remote sensing technology that uses light pulses to accurately measure the distance from the aircraft to the ground. LiDAR data collection flights for the CGEP were conducted by contractors Photo Science and Fugro Earth Data in March 2010, followed by months of post collection data processing. After post-processing, the data was then sent to a third party firm, Dewberry, for exhaustive quality assurance checks. The diligent work by the involved contractors led to the production of a very precise digital elevation model (DEM) for the CGEP area. The data has been delivered to the Coastal Regional Commission and is currently being distributed to stakeholders. The minimum vertical accuracy standard of 18 cm set forth by the CGEP stakeholders was surpassed and the final accuracy of the delivered product is just over 10 cm. This is due to the high quality standards held by the companies that were chosen to produce the data. The graphic is a representation of the DEM for the CGEP area.

The stakeholders will be using the CGEP LiDAR data for a vast array of projects. First and foremost, FEMA is using the data to produce highly accurate flood risk mapping to facilitate the reduction of the loss of life and property in Coastal Georgia. Other users will be using the data to produce elevation contours, map erosion and sedimentation of our beaches and marshlands, study utility and transportation corridors, assess wetlands and watershed drainage patterns, as well as planning for natural disaster response.

The 2011 City / County Directory is now available online for your convenience. To access the document go to <http://www.crc.ga.gov/Pages/news.aspx>. Once there, click on 2011 City County Directory.

If you'd like to receive a printed copy, please email Colletta Harper to request one, [charper@crc.ga.gov](mailto:charper@crc.ga.gov)

## Watershed Improvement Planning in Coastal Georgia

By Chris Emmer, AICP, CFM, Environmental Planner

**W**atershed Improvement Plans (WIP) are the next step in addressing Georgia's pollution impaired water bodies. The CRC is currently preparing two WIP's and establishing implementation plans. These WIPs are to be developed over two years and address the information required in Section 319 grant applications, a primary US Environmental Protection Agency (APA) program that addresses non-point water pollution.

The WIP process involves establishing a Partnership Advisory Committee (PAC), made up of local, regional and state stakeholders. The PAC selects the watershed, reviews the information, selects monitoring sites and recommends the best management practices to address the pollution problems. The Coastal Stormwater Supplement (CSS) Technical Advisory Committee (TAC) along with local, regional and state stakeholders are participating in the PAC. The PAC selected Jackson Branch in Screven County and the St. Mary's River – Catfish Creek Miller's Branch Segment for the WIPs. These two watersheds were selected for their different environments, with the purpose of the WIPs serving as models for the other impaired water bodies in the Region.

*Catfish Creek with Ken Kessler, Planning Director, Kingsland*

Local stakeholder meetings were held February 28th for the St. Mary's River in Kingsland, GA and March 1st for Jackson Branch in Sylvania, GA. Local support was provided from local citizens, Ogeechee Riverkeeper, St. Mary's River Management Committee, Satilla Riverkeeper, Camden County, Screven County, City of Kingsland, and City of St. Mary's.

The next step is conducting the Visual Survey of each watershed which identifies and confirms land uses, potential pollution sources and potential monitoring sites. The St. Mary's survey is conducted with assistance from Conn Cole of Camden County, and Camden County Sheriff's Office boat crew, Ken Kessler with City of Kingsland, Phil Jones with St. Mary's River Management Committee, Clay Montague, University of Florida Professor, Alice Vick and her boat crews with EPD, and CRC staff.

Diana Wedincamp, Ogeechee Riverkeeper is instrumental in providing boats and volunteers for the Jackson Branch Visual Survey. Screven County residents and Alice Vick of EPD provided assistance for the completion of the Jackson Branch survey.

Following data gathered from the surveys, the PAC selects monitoring sites and develops monitoring programs which begins in year two of the project. Based on monitoring results and field information, the PAC and local stakeholders select best management practices and establish an implementation process to improve water quality in the watersheds. The ultimate goal is to remove Jackson Branch and the St. Mary's River – Catfish Creek to Miller's Branch segment from Georgia's water quality impaired list.
